When a red lens is illuminated in a traffic-control signal by rapid intermittent flashes, and its use has been specifically authorized by the Department of Public Services, drivers shall stop before entering the nearer line or crosswalk of the street intersection, or at a stop line when marked, and the right to proceed shall then be governed by provisions of chapter 89, section 8 of the General Laws.

g) Flashing yellow. A flashing yellow lens shall indicate the presence of a hazard and drivers may proceed only with caution.

(b) Rubbish materials so sorted and separated for recycling shall, following their collection, be recycled for reclamation.

(c) For purposes of this section, the terms "rubbish" and "rubbish materials" shall be deemed as all non-putrescible solid wastes (excluding ashes) consisting of both combustible and noncombustible wastes, such as but not limited to paper, newsprint, cardboard, glass, metal, wood and rags.

(d) The Director of Public Services may from time to time make, amend and rescind such rules and regulations as are necessary to carry out the provisions of this section.

(b) Commercial: A minimum fee of $300.00 is hereby established for all commercial entities currently being serviced by the City of Beverly. The final fee and conditions shall be subject to the determination of the Director of Engineering, who shall establish a written standard therefore.

(c) Discounts and Waivers: [Based on Boston-Cambridge-Quincy, MA-NH HUD Metro FMR Area, FY2011 Income Limits Documentation]

(i) Senior Citizen: Any Senior Citizen (65 years or older) who owns and occupies a single dwelling unit with an income of $33,750.00 or less for a single adult; $38,550.00 or less for two or more adults will be eligible for a fifty percent (50%) discount of this fee.

(ii) Hardship Cases: The fee for any citizen who owns and occupies a single family home or condominium with an income of $20,250.00 or less for a single adult; $23,150.00 or less for two or more adults, will be waived.

(iv) Vacancies: Any property owner who owns an unoccupied unit shall be eligible to receive a credit for each full six-month period for which the unit is not occupied. Property owners must provide documentation to the City Engineer signed under the pains and penalties of perjury demonstrating that the unit was vacant during the entire six month billing period for which such credit is requested. Eligibility shall be determined by the City Engineer using a water bill, or in cases where a unit’s water meter is not separate from another unit, a letter or billing statement from the Electric Company.

(v) (e) Penalty: The City Engineer shall assess applicants a fine of not more than $250.00 for submitting false documentation.

(d) Enforcement: Any fee not paid within 60 days of the demand shall become, upon application of the Collector of the City of Beverly, a lien upon the property.
Billing: The annual fee will be collected in quarterly statements billed on the same cycle as the subject property’s water and sewer bill cycle.

This fee shall not be increased for any reason other than to offset an increase in the incineration cost per ton (“tipping fee”) or an increase in the contractual trash removal cost, and in such cases, the trash fee may not be increased beyond an amount equal to the increases in these costs.

Exemption: Any person who can demonstrate and document to the satisfaction of the City Engineer an alternative lawful disposal method may apply for an exemption from the fee.

Review: This ordinance is subject to a review on 1, March 2013 by the City Council whether or not to continue through FY 2014. If the Salem City Council or any of the companies mentioned have any work to be done in the street designated in the notice, it shall consult and arrange with the Director of Public Services in order that such work may be done before the surface of such street is prepared anew for public travel. The director shall also notify the abutters on such street and all other persons interested therein by publishing a notice of the work proposed in one (1) of the city newspapers at least one (1) week before beginning such work, and if any abutter or other person desires to open such street to do any work therein, application for a permit shall be made forthwith in order that the work may be done before the surface of the street is prepared as aforesaid. After such notice and opportunity have been given, no such council, company, abutter or person shall for the space of five (5) years break up the surface of such street so prepared, except in case of obvious necessity, to be certified to and approved by the Mayor. No street or way shall be opened by drain layers or other persons between the first day of December and the first day of the following April, except in case of necessity, certified to and approved by the Mayor, but nothing in this section shall prevent connection being made with a common sewer or drain when ordered by the board of health.

(Rev. Ords. 1973, § 27-7)

Section 29.02 Notice to certain corporations of proposed excavations.

(a) Whenever there is to be any excavation in any street or sidewalk in the city, the Director of Public Services shall notify the Boston Gas Company, the Massachusetts Electric Company, and Bell Atlantic, at least forty-eight (48) hours
before commencing the work to determine whether or not any pipes or conduits might be endangered by such excavation. Such excavations include: Water, sewer, surface drainage, tree removals, installation of posts to a depth of over one (1) foot, street repairs and construction, sidewalk repair and construction, etc.

(b) If it is determined by the aforesaid companies that their services might be endangered then such companies shall take appropriate measures to supervise and protect their respective services.

Any and all holders of permits as aforesaid shall provide suitable lights in and on all obstructions or excavations placed by them in such public streets or ways between sunset and sunrise, and shall provide a suitable boardwalk for the public use around such obstructions and excavations. In the case of failure to so provide suitable lights the director shall provide the same at the expense of the holder of the permit.

(Ord. No. 186, 5-15-89)

**Section 31.06 Requirements.**

(a) DPS.
(i) On new installations, the DEP or its designee will provide on-site evaluation and/or inspection of plans in order to determine the type of backflow preventer, if any, that will be required, and notify the owner of plan approval requirements by the appropriate reviewing authority.

(ii) For premises existing prior to the start of this program, the DPS will perform surveys of the premises and reviews of as-built plans and issue a cross-connection violation form to the owner detailing any corrective action required, the method of achieving the correction, and the time allowed for the correction to be made. The time period allowed shall depend upon the degree of hazard involved.

(iii) The DPS will not allow any cross-connection to remain unless it is protected by an approved backflow preventer for which a permit has been issued and which will be regularly tested to insure satisfactory operation. The DPS may require the installation of a temporary device if the DEP is late issuing a permit.

(iv) If the DPS determines at any time that a serious threat to the public health exists, the water service will be terminated immediately.

(v) The DPS shall have on its staff, or shall have a delegated representative, a person who is a backflow prevention device tester certified by the Commonwealth.

(iv) The owner shall inform the DPS of any proposed or modified cross-connection and also any existing cross-connections of which the owner is aware but has not been found by the DPS.

(v) The owner shall not install a by-pass around any backflow preventer unless there is a backflow preventer of the same type on the by-pass. Owners who cannot
shut down operation for testing of the device(s) must supply additional devices necessary to allow testing to take place.

(vi) The owner shall install backflow preventers in a manner approved by the department and by the DPS.

(vii) The owner shall install only reduced pressure backflow preventers and double-check valve assemblies approved by the state DEP.

(viii) Any owner of industrial, commercial or institutional premises having a private well or other private water source must have a permit if the well or source is cross-connected to the DPS's system. Permission to cross-connect may be denied by the DPS. The owner may be required to install a backflow preventer at the service entrance if a private water source is maintained even if it is not cross-connected to the commission's system.

Section 31.07 Degree of hazard.

(a) The DPS recognizes the threat to the public water system arising from cross-connections. As such, the DPS, whereas it is responsible for the quality of the public water supply, may require a containment device on the water service entrance to any customer who, as a result of unprotected cross-connections, could contaminate the public water supply system.

(Ord. No. 186, 5-15-89)

Section 31.08 Enforcement.

(a) The DPS shall not allow a cross-connection to exist with the public water supply system unless it is considered necessary and all appropriate approvals and permits have been issued. A fine of $500 per occurrence shall be assessed for a violation of this section.

(Ord. No. 186, 5-15-89)

Section 31.09 Existing in-use backflow prevention devices.
(a) Any existing backflow preventer shall be allowed by the DPS to continue in service unless the degree of hazard is such as to supersede the effectiveness of the present backflow preventer or result in an unreasonable risk to the public health. Where the degree of hazard has increased, as in the case of a residential installation converting to a business establishment, any existing backflow preventer must be upgraded to a reduced pressure backflow preventer, or a reduced pressure backflow preventer must be installed in the event that no backflow device was present.

(Ord. No. 186, 5-15-89)

(b) Periodic testing.

(c) Reduced pressure backflow preventers and double-check valve assemblies shall be tested and inspected at least semiannually by a certified device tester hired by the DPS. All tests shall be witnessed by the DPS's licensed staff tester.

(d) The testing shall be conducted during regular business hours. Exceptions to this, when at the request of the owner, may require additional charges to cover the increased costs to the DPS.

(e) Reduced pressure backflow preventers and double check valve assemblies must be tested annually by the owner, independent of the semiannual test by the DPS's representative, and such test must be conducted by a certified tester.

(f) Any backflow preventer which fails during a periodic test must be repaired or replaced by a licensed plumber. When repairs are necessary, upon completion of the repair, the device will be retested at the owner's expense to insure proper operation. High hazard situations will not be allowed to continue unprotected if the backflow preventer fails the test and cannot be repaired immediately. In other situations, a compliance date of not more than fourteen (14) days after the test date will be established. The owner is responsible for spare parts, repair tools or a replacement device. Parallel installation of two (2) devices is an effective means of the owner insure that uninterrupted water service remains during testing or repair of devices and is strongly recommended when the owner desires such continuity.

(g) Backflow prevention devices will be tested more frequently than specified above in subsection (a) in cases where there is a history of test failures and the DPS feels that, due to the degree of hazard involved, additional tests will be borne by the owner.

(Ord. No. 186, 5-15-89; Ord. No. 334, 8-23-95)

ARTICLE XXXII. STORMWATER AND CONSTRUCTION SITE MANAGEMENT

Section 32.01 Purpose

(a) The purpose of this Ordinance is to protect the surface water bodies, natural resources, and public and private property within the City of Beverly from the negative impacts caused by polluted and unmanaged stormwater runoff and activities related to development, construction and land surface alteration and work not otherwise subject to regulation by the Planning Board and/or the Conservation Commission. In response to the mandates set forth under the amendments to the Federal Clean Water Act, this Ordinance partially fulfills the requirement of the Phase II National Pollution Discharge Elimination System (NPDES) Permit in order to achieve compliance with the U.S. Environmental Protection Agency’s stormwater regulations.

(b) Because stormwater discharges from a variety of sources including storm sewers, construction, waste disposal, earth disturbance and resource extraction are major causes of impairment to the water quality of natural coastal and inland water bodies and wetland resource areas, this Ordinance is designed to regulate a myriad of aspects relating to the development or redevelopment of land as well as to detect and eliminate illicit discharges into the City’s storm drainage system.

(c) This Ordinance and the regulations promulgated hereunder serve to establish minimum standards, design criteria, implementation, guidance and enforcement to achieve the following objectives:

(i) Establish, regulate and enforce stormwater management standards for development and redevelopment projects by adopting and enforcing the nine (9)
Stormwater Management Standards set forth in the Massachusetts Stormwater Management Policy;

(ii) Detect and eliminate illegal discharges to the municipal storm drain system including but not limited to sewage, process wastewater, wash water, indoor drains, floor drains, sinks from residential, commercial or industrial sources;

(iii) Guide, regulate and manage construction activities that render soil exposed and vulnerable to erosion by wind and water as well as containing and properly managing potential on-site pollutants including but not limited to oils, gasoline, pesticides, paints, garbage and sanitary wastes;

(iv) Regulate the alteration of grades/elevations of the land surface by more than two feet to protect against damage to abutting properties and adjacent wetlands resource areas resulting from altered drainage patterns.

(v) Establish a Stormwater Management Advisory Committee to work with the Engineering Department in establishing and evaluating rules and regulations to further clarify and implement this Ordinance.

(Ord. No. 86, 5-12-2008)

Section 32.02 Applicability

(a) This Ordinance applies to all construction, development, and redevelopment activities that involve and/or impact stormwater discharge, soil disturbance, altering of grades or drainage patterns not expressly exempted from it.

(Ord. No. 86, 5-12-2008)

Section 32.03 Stormwater Management of New Development & Redevelopments

(a) Regulation of discharges to the municipal storm drainage system and the surface waters and wetlands is necessary for the protection of the City of Beverly’s water bodies and groundwater, and to safeguard the public health, safety, welfare and the environment. Increased and contaminated stormwater runoff associated with developed land uses and the accompanying increase in impervious surface is a major cause of impairment of water quality and flow in the ocean, lakes, ponds, streams, rivers, wetlands and groundwater, contamination of drinking water supplies, erosion of stream channels, alteration or destruction of aquatic and wildlife habitat, and flooding.

(b) This Ordinance establishes stormwater management standards for development and redevelopment projects that disturb an acre or more of land to minimize adverse impacts offsite and downstream which would be born by abutters, residents and/or the general public by:
(c) Complying with all other state and federal statutes and regulations relating to stormwater discharges and adopting the following Standards of the Massachusetts Stormwater Policy:

(i) Storm water management systems must be designed so that post-development peak discharge rates do not exceed pre-development peak discharge rates;

(ii) Loss of annual recharge to groundwater should be minimized through the use of infiltration measures to the maximum extent practicable. The annual recharge from a site post-development should approximate the annual recharge from the pre-existing or existing site conditions, based on soil types;

(iii) For new development, stormwater management systems must be designed to remove 80% Total Suspended Solids (TSS);

(iv) Redevelopment of previously developed sites must meet the Stormwater Management Standards to the maximum extent practicable;

(v) All stormwater management systems must have an operation and maintenance plan to ensure that systems function as designed.

(vi) Protecting groundwater and surface water from degradation;

(vii) Promoting groundwater recharge;

(viii) Preventing pollutants from entering Beverly’s municipal storm drainage system and to minimize discharge of pollutants from the system;

(ix) Ensuring adequate long-term operation and maintenance of structural stormwater best management practices so that they function as designed;

(x) Ensuring public safety and protecting public and private property, surface drinking water supplies, groundwater resources, recreation, aquatic habitats, fish and other aquatic life, property values and other uses of lands and waters;

(xi) Requiring practices to control the flow of stormwater from new and redeveloped sites into the Beverly storm drainage system in order to prevent flooding and erosion;

(xii) Establishing Beverly’s legal authority to ensure compliance with the provisions of this Ordinance through inspection, monitoring, and enforcement.

Section 32.04 Exemptions:

(a) Normal maintenance and improvement of land in agricultural use as defined by the Wetlands Protection Act regulation 310 CMR 10.04; Maintenance of existing landscaping, gardens or lawn areas provided such maintenance does not include the addition of soil material, or alteration of existing grades;

Projects wholly within the jurisdiction of the Conservation Commission and requiring an Order of Conditions.

(Ord. No. 86, 5-12-2008)

Section 32.05 Illicit Connections

(a) This Ordinance also provides for the health, safety, and general welfare of the citizens of Beverly by regulating storm water discharge into the City’s storm drain system and waterways in accordance with the requirements of the National Pollutant Discharge Elimination System (NPDES) permit process.

(b) The City’s storm drainage system includes storm water pipes and drainage waterways and conveys surface water runoff to receiving waters. Generally runoff enters the storm water drainage system piping through catch basins on streets and on public and private property and from drainage swales and ditches. No sewage discharge is allowed into this system.

(c) The City also has a separate piped municipal sanitary sewerage system. In order to reduce and eliminate infiltration and inflow into this system, no storm drainage discharge is allowed into the municipal sanitary sewer system from any source including, but not limited to, sump pumps and roof drainage. The sewerage system conveys wastewater from residences and commercial and industrial establishments to the South Essex Sewerage District wastewater treatment plant in Salem. The City’s sewerage system is regulated by the Sewers article hereunder.

(d) The objectives of this section are to:

(i) Minimize the contribution of pollutants to the municipal storm drainage system;

(ii) Minimize the negative impact of illicit connections and discharges upon the City’s natural resources;

(iii) Prohibit illicit connections and discharges to the municipal storm drainage system; and

(iv) Establish legal authority to carry out all inspection, surveillance and monitoring procedures necessary to ensure compliance with this Ordinance.

(Ord. No. 86, 5-12-2008)

Section 32.06 Erosion/Sedimentation and Materials Management
(a) During the construction process, soil is highly vulnerable to erosion by wind and water. Eroded soil endangers water resources by reducing water quality and causing the siltation of aquatic habitat for fish and other desirable species. Eroded soil also necessitates extraordinary maintenance and repair of storm drains and ditches and the dredging of lakes. In addition, clearing and grading during construction cause the loss of native vegetation necessary for terrestrial and aquatic habitat.

(b) Many potential pollutants other than sediment are associated with construction activities. These pollutants include pesticides, fertilizers used for vegetative stabilization; petrochemicals (oils, gasoline, and asphalt degreasers), construction chemicals such as concrete products, sealers, and paints, wash water associated with these products, paper; wood; garbage and sanitary wastes.

(c) As a result, the purpose of this section is to safeguard persons, protect property, and prevent damage to the environment in the City of Beverly. This Ordinance will also promote the public welfare by guiding, regulating, and controlling the design, construction, use, and maintenance of certain development or other activity that disturbs the topsoil or results in the movement of earth within the City of Beverly.

(d) No person shall be granted a site development permit for land-disturbing activity that would require the uncovering of one (1) acre or more (43,560 square feet) without the written approval of an Erosion/Sediment Control and Materials Management Plan by the Engineering Department. Such projects shall be required to submit an Erosion/Sediment Control and Materials Management Plan with the application when, in the opinion of the Director of Engineering or his designee, the submission of such a plan is needed to further the purpose and intent of this Ordinance and/or to safeguard surrounding property and public infrastructure systems.

(e) No person shall be granted a site development permit for land-disturbing activity that would require disturbing less than one acre but more than one-quarter acre without the approval of an Abbreviated Erosion/Sediment Control & Materials Management Application by the Engineering Department.

(f) No person shall be granted a site development permit for land-disturbing activity that would require disturbing less than one-quarter acre without the approval of a Minor Project Management Application by the Engineering Department.

Section 32.07 Exemptions:

(a) Any emergency activity that is immediately necessary for the protection of life, property, or natural resources;

(b) Repairs to any stormwater system deemed necessary by the City of Beverly

(c) Engineering Department or its designee; or
(d) Existing nursery and agricultural operations conducted as a permitted use.

(Ord. No. 86, 5-12-2008)

Section 32.08 Drainage Pattern Alterations

(a) Changing the grading of the land surface can have an impact on drainage characteristics of even relatively small watershed areas. Therefore, regulating proposed grading for all projects, including minor ones is necessary for the protection of the City of Beverly’s natural resources, and to safeguard public and private property from the potential negative impacts due to increased peak rate run off, increase in volume, and flooding.

(b) A permit required by this Ordinance will be issued by the City Engineer to the owner or the owner’s duly authorized agent after the City Engineer has reviewed a plan to be submitted showing the nature of the grade change proposed, but only on such conditions, which shall be determined by the City Engineer, that will ensure that the proposed grade changes will not adversely affect existing drainage and groundwater conditions that could affect the public health, safety and welfare of any public way or adjoining real estate.

(c) It shall be unlawful for any person or other legal owner of real property in the City to disturb the existing grade of land by more than two feet without first obtaining the approval of the City Engineer, and where applicable, the Conservation Commission (if the property is subject to the Wetlands Protection Act or the City’s Wetland Protection Ordinance and the Rules and Regulations adopted pursuant to that Ordinance) and the Planning Board (if the property is being altered pursuant to a plan subject to the Subdivision Control Law).

Section 32.09 Exemptions:

(Ord. No. 86, 5-12-2008)

Section 32.10 Responsibility For Administration

(a) The Director of Engineering shall administer, implement, and enforce the provisions of this Ordinance. (Ord. No. 86, 5-12-2008)

Section 32.11 Enforcement
(a) Any person violating any of the provisions of this Ordinance or of any order or permit issued hereunder shall be deemed guilty of a misdemeanor and each day during which any violation of any of the provisions of this Ordinance, order or permit is committed or continued shall constitute a separate offense. The Department or its delegated agents may issue a stop work order to the owner, the applicant, or the owner’s or applicant’s agent by certified mail, return receipt requested, and by posting the same in a conspicuous location on the work site. Upon conviction of any violation of this Ordinance, such person shall be punished by a fine of $300 for each offense. In addition to any penalty authorized by this section, any person violating any of the provisions of this Ordinance shall be required to bear the expense of site restoration. Nothing in this section, including the failure of the Department or its delegated agents to issue a stop work order, shall prevent the City from pursuing any other remedy provided for by law, including equitable relief, to restrain violations of this Ordinance.

(Ord. No. 86, 5-12-2008)

Section 32.12 Rules & Regulations

(a) The Director of Engineering in collaboration with the City of Beverly Stormwater Management Advisory Committee and Stormwater Coordinator shall be empowered to establish Rules and Regulations to govern the permitting process, including but not limited to fees, application procedures, definitions, use of consultants, security to assure performance, performance standards for work, and such other information the Department and Committee deems necessary to discharge its responsibilities. The Department and Committee may promulgate such rules and regulations to effectuate the purposes of this Ordinance by a majority vote of the duly appointed members of the Stormwater Management Advisory Committee. Failure by the Department and the Committee to promulgate such rules and regulations, or a legal declaration of their validity by a court of law, shall not act to suspend or invalidate the effect of this Ordinance.

(Ord. No. 86, 5-12-2008)

Section 32.13 Severability

(a) The invalidity of any section or provision of this Ordinance shall not invalidate any other section or provision thereof, nor shall it invalidate any permit, order or decision, which have previously become final.

(Ord. No. 86, 5-12-2008)

Such assessment shall be ascertained, assessed and certified by the City Council to the board of
assessors for assessment, and notice thereof shall be given to the party to be charged, or his tenant or lessee.

(Rev. Ords. 1973, § 25-4)

The assessors shall add one (1) of such parts with interest to the annual tax of such real estate each year next ensuing, until all such parts have been so added. Such assessments or charges or apportionments thereof shall constitute a lien upon the real estate, and may be collected according to the provisions of law made for the collection of taxes upon real estate. (ii) Options of city re admission into system of hazardous waste.

1) If any waters or wastes are discharged or proposed to be discharged into any sewers under the control of the city or any sewer tributary thereto within the South Essex Sewerage District, which waters contain the substances or possess the characteristics enumerated in Prohibited Discharges section of this article, and which in the judgment of the city and the South Essex Sewerage Board may have deleterious effects upon the sewerage works, processes, equipment, or receiving waters, or which otherwise create a hazard to life or constitute a public nuisance, the city may:

   a) Reject the wastes;

   b) Require pretreatment to an acceptable condition for discharge to the public sewers;

   c) Require control over the quantities and rates of discharge;
d) Require payment to cover the added costs of handling and treating the wastes not covered by existing taxes or sewer charges under the provisions of the last paragraph of this article.

2) If the city permits the pretreatment or equalization of waste flows, the design and installation of the plants and equipment shall be subject to the review and approval of the commissioner and plumbing inspector, and subject to the requirements of all applicable codes, ordinances, and laws. (Rev. Ords. 1973, § 25-59)

(iii) Traps and separators.

1) Garages and other establishments, where wastes containing grease in excessive amounts or any flammable waste, sand or other harmful ingredients can be discharged and are connected, directly or indirectly, with public sewers, shall be provided with a suitable trap or separator. All traps or separators shall be of a type and capacity approved by the director of the division of water pollution control or his authorized representative, and shall be located so as to be readily and easily accessible for cleaning and inspection.

(Rev. Ords. 1973, § 25-60)

(iv) Maintenance of facilities.

1) When required by the Director and plumbing inspector, the owner of any property serviced by a building sewer carrying industrial wastes shall install a suitable control manhole together with such necessary meters, and other appurtenances, in the building sewer to facilitate observation, sampling, and measurement of the wastes. Such manhole, when required, shall be accessibly and safely located, and shall be constructed in accordance with plans approved by the Director and plumbing inspector. The manhole shall be installed by the owner at his expense, and shall be maintained by him so as to be safe and accessible at all times.

(vi) Compliance with standard methods; sampling.
1) All measurements, tests and analyses of the characteristics of waters and wastes to which reference is made in this article shall be determined in accordance with the latest edition of Standard Methods for the Examination of Water and Wastewater, published by the American Public Health Association, and shall be determined at the control manhole provided, or upon suitable samples taken at such control manhole. In the event that no special manhole has been provided, the control manhole shall be determined by the commissioner. Sampling shall be carried out by customarily accepted methods to reflect the effect of constituents upon the sewage works, and to determine the existence of hazards to life, limb and property. (The particular analyses involved will determine whether a twenty-four-hour composite of all outfalls of a premises is appropriate, or whether a grab sample or samples should be taken. Normally, but not always, BOD and suspended solids analyses are obtained from twenty-four-hour composites of all outfalls where pH's are determined from periodic grab samples).

(Rev. Ords. 1973, § 25-63)

(vii) Agreements allowing acceptance of unusual-strength wastes.

1) No statement contained in this article shall be construed as preventing any special agreement or arrangement between the city and any industrial concern whereby an industrial waste of unusual strength or character may be accepted by the city for treatment, subject to payment therefor, by the industrial concern.

(vii) Remove any guard, stake, or other device or material intended for the protection or support of any public tree or shrub.

(viii) Place any earth fill, rock, trash, or other material within the tree protection zone of any public tree or shrub that may compact or prevent the entry of air and water to the root zone.

(c) Obstruction of Signs, Signals, Travel. The City Arborist may waive the provisions of this section for newly planted or naturally low-profile trees if he/she determines that they do not interfere with public travel, obstruct the light of any streetlight, obstruct the view of any traffic sign or signal, or endanger public safety.

Section 36.06 Protection of Public Trees and Shrubs

(a) No person shall plant, remove, maintain or protect any public tree or shrub, or cause such work to be done without obtaining permission from the City Arborist.

(b) Any person desiring to plant, remove, maintain or protect any public tree or shrub shall request in writing to the City Arborist for approval to perform such work. Such request shall specify the location and description of the proposed work. If the City Arborist determines that the proposed work is necessary and in accord with the purposes of this ordinance, taking into account the safety, health, and welfare of the public, location of utilities, public sidewalks, driveways and
streetlights, general character and aesthetic quality of the area in which the tree or shrub is located or proposed to be located, and the soil conditions and physiological needs of the tree or shrub, he/she shall approve the request.

(c) Any person aggrieved by the decision of the City Arborist to permit or deny a request to plant, remove, maintain or protect any public tree or shrub may request a review of that decision by the Committee on Public Service and Aid of the City Council.

(d) The City Arborist develops and maintains a list of desirable trees for planting along streets. Efforts shall be made to ensure a sufficient diversity of tree species.

(e) Arboricultural Specifications and Standards. The following specifications and standards are hereby established for the planting, pruning, and removal of all public trees and shrubs within the City:

(i) Planting

1) No tree shall hereafter be planted which is less than one and one-half (1 1/2) inches in diameter at six (6) inches above the ground

2) No street tree shall be planted less than ten (10) feet from any driveway or fire hydrant, or within the designated clear-vision triangle or less than thirty (30) feet from any street corner, whichever is greater.

3) All street trees hereafter planted shall be spaced not less than twenty-five (25) feet apart except that a tree planted for the purpose of future replacement of an existing declining tree may be planted less than twenty-five feet from the declining tree. The actual spacing, location, and alignment of street trees shall be determined by the City Arborist based on the mature size of the species to be planted and the specific site limitations.

4) The following shall not be planted in the public ways of the city: any conifer, any species of the genus Populus, any Ailanthus, Catalpa, Mountain Ash, Box Elder, Silver Maple, Willow, White Bark Birch, Black Locust, or such other species that shall be determined to be unsuitable for street planning.

2) It shall be unlawful as a normal practice for any person, firm, or city department to top any street tree, park tree, or other tree on public property. Topping is defined as the severe cutting back of limbs to stubs larger than three inches in diameter within the tree’s crown to such a degree so as to remove the normal canopy and disfigure the tree. Trees severely damaged by storms or other causes, or certain trees under utility wires or other obstructions, where other pruning practices are impractical may be exempted from this ordinance at the determination of the City Arborist.

(iii) Removal

1) The City Arborist may remove or order to be removed, any tree or part thereof which is in an unsafe condition or which by reason of its nature is injurious to sewers, electric power lines, gas lines, water lines, or other public improvements, or is affected with any injurious fungus, insect, or other pest.

2) Trees shall be completely removed from the growing site and disposed of in the proper manner. Any person or firm engaged in the removal of any public tree or shrub shall have the necessary limits of insurance and shall be held liable for any injury or damage to persons or property.

3) Stumps and roots that elevate sidewalks and/or boulevards shall be removed from the growing site by grinding or other means to a depth suitable for the future planting of trees, shrubs, or turf. The hole created by removal of a stump shall be filled to the level of surrounding grade with mineral topsoil, tamped to prevent settling and seeded with mixture of grass species appropriate for the site.

(iv) Spraying, injecting, fertilizing, bracing, cabling or other arboricultural operations or treatments shall be performed in a neat and professional manner according to accepted arboricultural standards and in compliance with all laws governing the use of pesticides.

Section 36.07 Cost of Planting and Protection of Public Trees

(a) The entire cost of planting, removal, maintenance, and protection of trees and shrubs in all public areas of the City when performed by department employees or their contractors at the direction of the City Arborist, shall be borne by the City out of the departments budgets, or from funds donated or otherwise acquired for this purpose. When a private party other than the city plants, removes, maintains, or protects public trees or shrubs pursuant to Intent and Purpose Section of this article, said party shall incur all expenses connected therewith.

Section 36.08 Penalties

(a) Any person violating any provision of this ordinance shall be, upon conviction or a plea of guilty, subject or a fine not to exceed $1,000. In addition to a fine, the
City may require restitution for the fair market value of the tree(s) and/or shrub(s) that were damaged or destroyed as a result of violation of this ordinance.

Section 36.09 Severability

(a) If any section, subsection, sentence, clause or phrase of this ordinance is for any reason held to be invalid or unconstitutional by reason of any decision of any court of competent jurisdiction, such decision will not affect the validity of any other section, subsection, sentence, clause, phrase, or portion thereof irrespective of the fact that any one or more sections, subsections, sentences, clauses, phrases or portions thereof may be declared invalid or unconstitutional.

(Ord. No. 161, 6-6-2002)

ARTICLE XXXVII. WETLANDS PROTECTION

(Ord. No. 234, 12-6-01)

Section 37.01 Purpose

(a) The purpose of this ordinance is to provide more protection to the wetland resource areas of the City of Beverly than is already granted by the Wetland Protection Act M.G.L. Chapter 131, Section 40 and the Regulations 310 CMR 10.00. It is intended to be more protective than the existing regulations and therefore more beneficial to the specific needs and values of this community. It would provide the Conservation Commission more authority to regulate activities that might have a harmful effect on the following important interests: public or private water supply, groundwater, flood control, erosion and sedimentation control, storm damage prevention, water pollution control, fisheries, shellfish, wildlife and rare species habitat, agriculture, aquaculture and recreation.

Section 37.02 Jurisdiction

(a) Except as permitted in writing by the Commission, or as provided in this Ordinance, no person shall engage in the following activities ("activities"): removal, filling, dredging, discharging into, building upon, or otherwise altering or degrading the City's wetland resource areas, consisting of:

(i) any isolated vegetated wetland,

(ii) any vernal pool,

(iii) any vegetated wetland bordering on any creek, river, stream, pond or lake,

(iv) any bank, beach, fresh or salt water marsh, wet meadow, bog or swamp,

(v) any land under any creek, river stream, pond or lake,
(vi) any 100-foot buffer zone of wetland areas 1-5 listed above,
(vii) any land subject to storm flowage, or flooding by groundwater or surface water,
(viii) the 200-foot riverfront area,
(ix) ocean
(b) The wetland resource areas listed in 1-9 above may also be protected under the Massachusetts Wetlands Protection Act. M.G.L. Chapter 131, Section 40 ("the Act") and its accompanying regulations 310 CMR 10.00.
(c) The Commission shall not grant such permission without receiving written notice of the intention to conduct such activity, and without issuing written permission to do so all in compliance with the provisions of this Ordinance.

Section 37.03 Exemptions

(a) This Ordinance shall not apply to the following activities:

   (i) Emergency projects as defined in the Commission's regulations; or

   (ii) Maintenance, repair, or replacement, without substantial change or enlargement, of existing and lawfully located structures or facilities used in the service of the public and used to provide electric, gas, water distribution, telephone, or other telecommunication services to the public; or

   (iii) Normal maintenance of land in active agricultural use, as defined in the Commission's regulations; or

   (iv) Maintenance and repair of existing public ways; and

(b) All appropriate measures should be undertaken to prevent damage to any resource areas that would have a detrimental effect on the interests of the Ordinance and the Act.

Section 37.04 Applications to Perform Work

(a) All applications to perform activities in the City's resource areas shall be either in the form of a Request for Determination of Applicability or a Notice of Intent, or both. Such applications shall contain data and plans as specified in the Commission's regulations, and shall be submitted in complete written form to the Commission as required by this Ordinance, regulations, and application checklist (Appendix A of Regulations). The date which serves to commence the Commission's deliberation period is the date of receipt of the application at its offices, during regular office hours. The City's Conservation Administrator shall be authorized to make determinations of completeness for applications submitted to the Commission and shall reject, within two (2) business days, those
applications that do not meet the minimum submittal requirements of this
Ordinance, regulations, and application checklist. In order to provide sufficient
review time the Commission may continue a public hearing or public meeting if
new information is submitted by the applicant, or applicant's agent, less than
seven (7) business days before the scheduled public hearing or public meeting.

(b) The applicable forms may be obtained from the Commission and must be signed
by the applicant or applicant's agent where required. The Commission may
require further information by Regulations, guideline, or as otherwise deemed
necessary by the Commission. No such application shall be accepted as complete
before all permits, variances, and approvals required by the Ordinances of the
City with respect to the proposed activity, at the time of such Notice, have been
applied for or obtained. Such application shall also include any information
submitted in connection with such permits, variances, and approvals which is
necessary to describe the effect of the proposed activity on the resource area(s).

(c) Upon receipt of a permit application or RFD for complex projects such as
subdivisions, the Commission is authorized to require the applicant to pay with a
reasonable cost determined by the Commission (not to exceed 0.5% or $5,000) for
specific expert engineering and other consultant services deemed necessary by the
Commission to finalize the decision on the application. Any unused portion will
be returned to applicant.

Section 37.05 Hearings

(a) Combination with State Law Hearing:

(i) The said Commission, in its discretion, may hear any oral presentation under
this Ordinance at the same public hearing required to be held under the
provisions of Chapter 131, Section 40 of the Massachusetts General Laws.
Notice of the time and place of such hearing(s) shall be given as required below.

(b) Notice:

(i) Notice of the time and place of the hearing shall be given at the applicant's
expense, not less than seven (7) calendar days prior to the public hearing, by
publication in a newspaper of general circulation in Beverly, and by mailing a
copy of such notice to all land owners within 300 feet of land on which the work
is proposed. All publications and notices shall contain the name of the
applicant, a description of the area where the activity is proposed by street
address, if any, or other adequate identification of the location of the area or
premises which is the subject matter of the hearing, and the nature of the action
or relief requested, if any. Public notice requirements for continued public
hearings under this Ordinance shall be the same as the notification requirements
set forth in 310 CMR 10.05(5)(b)3.

(c) Proof:
(i) The applicant shall have the burden of providing by a preponderance of credible evidence that the activity proposed in the Notice of Intent will not cause adverse impacts to any of the interests and values intended to be protected by this Ordinance. Failure to provide the Commission adequate evidence for it to determine that the proposed activity will not cause adverse impacts shall be sufficient cause for the Commission to deny permission or to grant such permission with such conditions as it deems reasonable, necessary, or desirable to carry out the purposes of this Ordinance; or to postpone or continue the hearing to another date certain to enable the applicant and others to present additional evidence, upon such terms and conditions as deemed by the Commission to be reasonable.

(ii) Due consideration shall be given to possible effects of the proposal on all interests and values to be protected under this Ordinance and to any demonstrated hardship on the petitioner by reason of a denial, as brought forth at the public hearing.

(d) Filing fees are non-refundable. Review fees not totally expended by the Commission shall be refunded.

(e) Continuances:

(i) The Commission may continue a public hearing or public meeting in the following situations:

1) With the consent of the applicant, to an agreed-upon date which shall be announced at the hearing; or

2) Without the consent of the applicant, to a specific date for the reasons stated at the hearing, including but not limited to receipt of additional information from the applicant or others; and

3) Any application that expires would require refiling of the Notice of Intent.

(f) Investigations:

(i) The Commission, its agents, officers, and employees, may enter upon privately owned land for the purpose of carrying out its duties under this Ordinance and may make or cause to be made such examination or survey as deemed necessary.

Section 37.06 Orders and Decisions

(a) All Orders and Decisions:

1) If the Commission determines that the proposed activity does not require the imposition of conditions to preserve and protect the interests of this Ordinance, the applicant shall be so notified in writing.
2) If, after the hearing, the Commission determines that the proposed activity is significant to one or more interests and values of this Ordinance, the Commission may vote to issue written Orders of Conditions within 21 days of the close of the public hearing. The Commission may impose such conditions, safeguards, and limitations on time and use upon such activity as it deems necessary to protect those interests and values.

3) The Commission may prohibit such activity altogether, in the event that it finds that the interests and values of this Ordinance cannot be preserved and protected by the imposition of such conditions, safeguards, or limitations.

(b) Security to Assure Performance:

(i) The Commission may, as part of its Order of Conditions, require, in addition to any security required by any other City or State Board, Commission, agency, or officer, that the performance and observance of the conditions, safeguards, and limitations imposed under this Ordinance on the applicant and owner be secured by one, or both, of the following methods:

1) Deposit: By the deposit of money, sufficient to complete the work as proposed, to secure performance of the conditions and observance of the safeguards of such Order of Conditions. Such security, if filed or deposited, shall be approved as to form and manner of execution by City Counsel or the City Treasurer.

2) Land Restriction(s): By a Conservation restriction, easement, or other covenant running with the land, executed and properly recorded (or registered, in the case of registered land).

(c) Duration of Orders: All Orders of Conditions shall expire three (3) years after the date of issuance. An Order of Conditions may be extended for one (1) year upon the request of the applicant. The request for an extension of an Order of Conditions shall be made to the Commission at least 30 days prior to expiration of the Order of Conditions. The Commission may grant only two (2) extensions for an individual Order of Conditions.

(d) No activity governed by an Order of Conditions shall be performed unless and until all permits, approvals, and variances required by the Ordinances of the City shall have been obtained, such Order of Conditions or notification shall have been recorded or registered at the Essex South District Registry of Deeds, and all applicable appeal periods have expired. The Commission shall have the right to record or register its Order of Conditions with said Registry of Deeds. No work shall proceed until proof is provided that the Order of Conditions has been properly recorded at the Registry of Deeds. In the event that an Order of Conditions issued pursuant to this Ordinance is identical to a final Order of Conditions issued pursuant to the provisions of M.G.L Chapter 131, Section 40, only one such order need be recorded or registered.
(e) Modifications, Amendments, Revocations:

(i) The Commission shall have the authority (on its own motion or upon the petition of the applicant, or any person interested) to modify, amend, or revoke an Order of Conditions. In revoking an Order of Conditions, the Commission shall officially notify the interested parties through certified mail and hold a public hearing within 21 days of the notification date. In the case of an amendment to an Order of Conditions, the Commission shall have the discretion to decide if a public hearing is warranted. This decision shall be based on the potential impact of the proposed work and its effect on the ability of the identified wetland resource areas to provide those interests as defined under the Act and Ordinance. No public hearing is required for a modification to an Order of Conditions. Written notification to the applicant by certified mail is required in all cases where the Commission initiates a modification, amendment, or revocation of an Order of Conditions.

Section 37.07 Certificates of Compliance

(a) The Commission shall, upon receiving a written request and weather permitting, inspect the resource areas where the activity governed by an Order of Conditions was carried out and issue a Certificate of Compliance (or Partial Certificate of Compliance) to the owner of the property, applicant, or applicant's representative, in a form suitable for recording or registering, if it shall determine that all of the activity(ies), or portions thereof, limited thereby have been completed in accord with said Order.

(b) Rules and Regulations

(i) The Commission shall be empowered to establish Rules and Regulations to govern its affairs, including but not limited to fees, definitions, use of consultants, security to assure performance, performance standards for work in wetland resource areas, and such other information the Commission deems necessary to discharge its responsibilities. After due notice and public hearing, the Commission may promulgate such rules and regulations to effectuate the purposes of this Ordinance, by a majority vote of the duly appointed members.

(ii) Failure by the Commission to promulgate such rules and regulations, or a legal declaration of their validity by a court of law, shall not act to suspend or invalidate the effect of this Ordinance.

Section 37.08 Enforcement, Investigations and Violations

(a) In accord with the provisions of M.G.L. Chapter 40, Sections 21D and 31 as well as every other authority and power that may have been or may hereafter be conferred upon it, the City may enforce the provisions of this Ordinance, restrain violations thereof, and seek injunctions and judgments to secure compliance with its Orders of Conditions. Without limiting the generality of the foregoing:
(i) Any person who violates any provision of this Ordinance or of any condition of a permit issued pursuant to it may be punished by a fine pursuant to Massachusetts General Laws, Chapter 40, Section 21. Each day or portion thereof during which a violation continues shall constitute a separate offense; if more than one, each condition violated shall constitute a separate offense. This Ordinance may be enforced pursuant to Massachusetts General Laws Chapter 40, Section 21D, by a City police officer, other persons having police powers, Conservation Commissioners, or the Conservation Administrator.

(ii) In accordance with Ch. 40 S. 21D, violators shall, at the discretion of the enforcement authorities, be charged a penalty. The penalties for violations of this Ordinance or regulations promulgated hereunder may be assessed as follows:

(b) In the event of a violation of this Ordinance or of any order issued thereunder, the Commission or its agents may issue a stop work order to the owner, the applicant, or the applicant's agent by certified mail, return receipt requested, or by posting the same in a conspicuous location on said site. Any person who shall violate the provisions of a stop work order shall be deemed in violation of the Ordinance; but the failure of the Commission to issue a stop work order for any reason shall not prevent the City from pursuing any other legal remedy at law or in equity to restrain violations of this Ordinance or promulgated regulations and to secure compliance with its Orders.

(c) The City shall be the beneficiary of all fines imposed on account of the violation of this Ordinance or promulgated regulations in order to defray the expense of enforcing the same.
(d) Upon request of the Commission, the City Council and City Solicitor shall take such legal action as may be necessary to enforce this Ordinance or promulgated regulations and permits issued pursuant to it.

(e) Upon recommendation of the Commission, the City Council may employ Special Counsel to assist the Commission in carrying out the legal aspects, duties, and requirements of this Ordinance and promulgated regulations.

Section 37.09 Responsibility for Compliance and Ownership Transfers

(a) After the recording of a Notice of Violation or Order, any person who purchases, inherits, or otherwise acquires real estate upon which work has been done in violation of the provisions of this Ordinance or in violation of any Order issued under the Ordinance shall forthwith comply with any such Order or restore such land to its condition prior to any such violation; provided, however, that no action, civil or criminal, shall be brought against such person unless such action is commenced within three years following the recording of the deed or the date of death by which such real estate was acquired by such person.

Section 37.10 Captions and Severability

(a) The captions used herein are for convenience only and are expressly intended to have no legal or binding significance. The invalidity of any section or provision of this Ordinance shall not invalidate any other section or provision thereof, nor shall it invalidate any Order of Conditions or decisions which have previously become final.
