Company

Scope of Work:

The work under this contract consists of the reconstruction of various streets.

The work shall consist of scarifying and pulverizing the existing bituminous paved area and underlying material to form an asphaltic stabilized base and the removal and disposal of existing bituminous paved areas.

Qualifications:

It is the responsibility of each Contractor submitting proposals for the work to assure himself/herself that the equipment/construction methods he/she intends to use are capable of complying with project specifications. The attention of each Contractor submitting a Proposal is directed to that portion of the project specifications which require the Contractor to demonstrate to the Engineer the ability of his/her crew(s) and equipment to comply with the specifications requirements and to do so at a rate of production consistent with the time allowed under the contract.

In submitting proposals for this work, Contractors are required to identify specific equipment to be used on the project. In order to meet the project schedule, the Contractor is required to provide a minimum of two (2) operable traveling hammer mills on site at all times while the crushing process is in progress.

Time Periods:

The Contractor to whom the Contract is awarded shall be required to execute the Contract and furnish the insurance and bonds duly executed with a satisfactory surety company within five (5) days, excluding Saturdays, Sundays and legal holidays of the date of the mailing of the notice to the bidder according to the address given by him/her, that the Contract is ready for execution.

The Contractor shall be required to start work within ten (10) days of receipt of a notice to proceed and shall complete all work in a timely fashion as determined by the Director of Public Services or his designee. Timely fashion shall be determined on a job specific basis by the Director of Public Services or his designee.

Construction Methods:

1) *Tie Card Documentation/Submission*

The Contractor will be responsible for measuring and maintaining swing tie records for all utility structures including, but not limited to, sewer manholes, drain manholes, water gates, catch basins, gas gates/drip boxes, monitoring wells and telecommunication manholes.

A copy of the utility swing tie records shall be submitted to the City of Beverly Engineering Department prior to the commencement of reclamation.

2) *Lowering/Plating Structures*

- Contractor shall supply plates to protect all existing casting and structures.

- Contractor shall be responsible for storage/securing any temporarily removed and plated structures.
- Any exposed catch basins shall be protected from sediment at all times.
- The Contractor shall protect all existing curb work. All existing pavement on side streets, driveways and limits of work shall be saw cut and protected from damage.

3) *Road Surface Reclamation*

The pavement area to be reclaimed shall be swept with a power sweeper to remove all sand, dirt, organic matter, and other unsuitable materials.

The Contractor shall reclaim only that area of pavement that can be processed and compacted by the end of the same working day. Reclaimed areas shall be acceptable for vehicular traffic at the end of each working day.

The existing road pavement shall be scarified and mixed with an equal amount of the gravel base existing in the roadway foundation. The mixture of scarified pavement and equal amount of gravel base shall be crushed simultaneously by a traveling hammer mill or rotating drum so that the friction heat generated from the crushing operation will allow the asphalt content of scarified pavement to coat the fines of the virgin base. This simultaneous crushing must blend the asphalt and gravel fines into a homogenous mass, utilizing the asphalt acquired from the existing pavement as a stabilizer which bonds the materials together when compacted. The crushed material shall pass the 3-inch sieve and meet the following gradation:

<i>Sieve Designation</i>	<i>% Passing by Weight</i>
3 Inch	100
1 ½ Inch	70-100
¾ Inch	55-90
No. 4	40-75
No. 40	10-30
No. 200	3-10
Residual A.C.	2-4

The method used shall ensure that the entire mass of material so worked shall be uniformly graded to these specifications. If additional fines are required, the Contractor will be directed to add material, furnished by others, or he/she may add material directly from the existing roadway foundation with approval of the Engineer, but scarified pavement and gravel fines must be crushed together. After the material has

been thoroughly worked together as described in the above paragraph, it shall be shaped and graded as directed by the Engineer.

4) *Rough Grading*

Before surfacing or sub-base is spread, the subgrade shall be shaped to a true surface conforming to the proposed cross section of the highway and compacted in accordance with the provisions of MassDOT Specifications Subsections 150.60 and 150.62.

5) *Excess Material Removal & Fine Grading*

All depressions and high spots shall be filled with suitable material or removed and such areas again compacted until the surface is smooth and satisfactorily compacted. A tolerance of ½ inch above or below the finished subgrade will be allowed provided that this ½ inch above or below grade is not maintained for a distance longer than 50 feet and that the required crown is maintained in the subgrade.

6) *Compaction*

Water shall be applied during the entire operation to ensure the optimum moisture content at time of compaction.

The restored cross-section shall be thoroughly compacted to a dense consolidated mass by rolling with a steel wheel roller weighing not less than fourteen (14) tons. The required density, as approved by the Engineer, shall be determined by the number of passes of said rollers to produce the maximum and uniform density throughout the entire area of the work to be done under this item as established upon a test area at the job site by the sand volume method or a nuclear device. Any portion of the subgrade that is not accessible to a roller shall be thoroughly compacted with the mechanical tampers or by other adequate methods approved as satisfactory by the Engineer. The Contractor, as soon as practical, shall prepare a test section area to enable the Engineer to conduct the necessary tests. An application of calcium chloride of .25 gallons per square yard shall be applied after the reclaimed base material is fine graded, and prior to the paving or as requested by the Director of Public Services or his designee. The calcium chloride solution shall be provided by the manufacturer as a true solution and shall not be reconstituted from flake calcium chloride. The calcium shall meet the following material specifications (see ASTM Designation D98: AASHTO-M144).

Calcium Chloride	35% ± 1%
Alkali Chloride as NaCl	2%
Magnesium as MgCl	0.1%
Typical: (in lbs. per gallon)	
Calcium Chloride	5.05
Sodium Chloride	0.2

Magnesium Chloride	0.004
Calcium Sulfate	0.004
Water	<u>6.002</u>
<i>Total</i>	11.26

Maintenance and protection of traffic, dust control and daily clean-up throughout the project area shall be the responsibility of the Contractor.

7) *Raise Structures*

One (1) foot per vertical rebuild shall be included in the price per structure. All materials and associated labor cost will be included in the per unit price.

8) *Final Cleanup*

Upon completion of the work and before acceptance and final pavement, the Contractor shall remove and dispose in an approved manner, at his own expense, from the right-of-way, construction site, dredging site, and adjoining property; all temporary structures and all surplus materials and rubbish which the Contractor may have accumulated during the prosecution of work, and shall leave the areas in a neat and orderly condition.

No equipment or material shall be left within any of the aforementioned areas after acceptance of the Contract without the written permission of the Engineer. The Contractor shall not abandon any material at or near the site regardless of whether or not it has any value.

Provisions for Travel and Prosecution of Work:

If found to be necessary, the road shall be constructed one-half (½) width at a time to allow for passage of through traffic. Access to property of abutters is to be provided as necessary.

Utilities:

Utility poles will be moved where necessary by the respective companies at their own expense. Method of Measurement:

The yardage to be paid for shall be the number of square yards of pavement rehabilitated or reclaimed in place as directed, completed and accepted by the Engineer.

The unit price for all readjusted structures shall be all in for the removal, plating and resetting of the structures.

Basis of Payment:

Payment will be made at the contract unit price per square yard for rehabilitated and reclaimed pavements, which shall be full payment for scarifying, loosening, pulverizing, regrading, compaction and fine grading, ready for plant mix wearing surface. Payments shall be made within thirty (30) working days after receipt of an approved itemized invoice. No payment shall be made for items not ordered or for cancelled items, nor for necessary incidental work considered by the City of Beverly to be included in the unit prices bid.

If the Contractor determines a discrepancy in billing it must be brought to the City's attention within sixty (60) days of the original invoice date.

Sub-Grade Charges:

- A. Where necessary the Contractor shall furnish equipment on an hourly basis at the rates quoted on the **Bid Pricing Form** (Rates to include operator and fuel).

Information about Prevailing Wage Schedules for Awarding Authorities and Contractors

- This wage schedule applies only to the specific project referenced at the top of this page and uniquely identified by the “Wage Request Number” on all pages of this schedule.
- An Awarding Authority must request an updated wage schedule from the Department of Labor Standards (“DLS”) if it has not opened bids or selected a contractor within 90 days of the date of issuance of the wage schedule. For CM AT RISK projects (bid pursuant to G.L. c.149A), the earlier of: (a) the execution date of the GMP Amendment, or (b) the bid for the first construction scope of work must be within 90-days of the wage schedule issuance date.
- The wage schedule shall be incorporated in any advertisement or call for bids for the project as required by M.G.L. c. 149, § 27. The wage schedule shall be made a part of the contract awarded for the project. The wage schedule must be posted in a conspicuous place at the work site for the life of the project in accordance with M.G.L. c. 149 § 27. The wages listed on the wage schedule must be paid to employees performing construction work on the project whether they are employed by the prime contractor, a filed sub-bidder, or any sub-contractor.
- All apprentices working on the project are required to be registered with the Massachusetts Division of Apprentice Standards (DAS). Apprentice must keep his/her apprentice identification card on his/her person during all work hours on the project. An apprentice registered with DAS may be paid the lower apprentice wage rate at the applicable step as provided on the prevailing wage schedule. **If an apprentice rate is not listed on the prevailing wage schedule for the trade in which an apprentice is registered with the DAS, the apprentice must be paid the journeyworker's rate for the trade.**
- The wage rates will remain in effect for the duration of the project, except in the case of multi-year public construction projects. For construction projects lasting longer than one year, awarding authorities must request an updated wage schedule. Awarding authorities are required to request these updates no later than two weeks before the anniversary of the date the contract was executed by the awarding authority and the general contractor. For multi-year CM AT RISK projects, awarding authority must request an annual update no later than two weeks before the anniversary date, determined as the earlier of: (a) the execution date of the GMP Amendment, or (b) the execution date of the first amendment to permit procurement of construction services. Contractors are required to obtain the wage schedules from awarding authorities, and to pay no less than these rates to covered workers. The annual update requirement is not applicable to 27F “rental of equipment” contracts.
- Every contractor or subcontractor which performs construction work on the project is required to submit weekly payroll reports and a Statement of Compliance directly to the awarding authority by mail or email and keep them on file for three years. Each weekly payroll report must contain: the employee’s name, address, occupational classification, hours worked, and wages paid. Do not submit weekly payroll reports to DLS. A sample of a payroll reporting form may be obtained at <http://www.mass.gov/dols/pw>.
- Contractors with questions about the wage rates or classifications included on the wage schedule have an affirmative obligation to inquire with DLS at (617) 626-6953.
- Employees not receiving the prevailing wage rate set forth on the wage schedule may report the violation to the Fair Labor Division of the office of the Attorney General at (617) 727-3465.
- Failure of a contractor or subcontractor to pay the prevailing wage rates listed on the wage schedule to all employees who perform construction work on the project is a violation of the law and subjects the contractor or subcontractor to civil and criminal penalties.
