

**CITY OF BEVERLY
ADDENDUM NO. 1, April 21, 2016**

RE: 16-024 WATER SYSTEM IMPROVEMENTS

**FROM: David Gelineau
Purchasing Agent
City of Beverly
191 Cabot Street
Beverly, MA 01915**

Please acknowledge receipt via electronic mail, telephone, or facsimile

TO: ALL PROSPECTIVE BIDDERS

This addendum forms a part of the Invitation for Bids from the City of Beverly for:
16-024 Water System Improvements

The following requirement is deleted: Bidders must be currently prequalified by MassDOT, Highway Division in the specified class of work with a single contract limit greater than or equal to the project value.

Bidders do not have to be MassDot prequalified, however they must have performed at a minimum three (3) projects of 2,500 linear feet or greater in the last 3 years. See section 02667 section 1.01.E

Question: Can the City consider separating bypass piping into a separate lump sum line item?

Answer: Attached please find a revised bid tab depicting Item #10 as a separated *Lump Sum* for temporary services / by-pass item. Temporary services is no longer tracked under Items 1a - 1f and 9a-9e and relocated to Item #10. All by-passing for construction and maintaining temporary service to effected domestic and fire protection connections shall be included under this line item. This item will be reimbursed on a percent completion basis based on a schedule of values.

Question: Are existing copper connections being replaced?

Answer: Existing copper connections that will only receive necessary blow-back under Cement Mortar Ling of Water Main section, will not be replaced. Blow-back will be included in main lining.

Question: Will water ties be provided?

Answer: City record water ties have been provided for reference only. CCTV inspection will further determine accurate service locations.

Question: May the contractor reuse corps?

Answer: Existing corps to remain shall be reamed if reused. If not reused, they are to be capped and inspected.

Question: What is the purposed of the separate 1" Iron replacement line item 2d compared to Item 2c?

Answer: Item 2d is redundant and has been removed.

Question: Is a system map available?

Answer: All side streets in the contract include municipal water infrastructure. Streets are primarily fed from the west via Salem Beverly Water Supply Board near Wenham Lake or via the Brimbal Hill Drive water tank. Back-fed streets include: Ash St, Desmond Rd, Wedgmere Rd via Temi Rd, Temi Rd, Glen Urquhart School (the eastern Farms Ln driveway), Greenwood Ave, Haskell St, and Hale St. The hydrant locations may be viewed on the City's online GIS website linked from the bottom of the home page at www.beverlyma.gov. A blow up of this portion of the system has been attached to this addenda for record information only.

Question: Can you please clarify temporary service / by-pass requirements?

Answer: 6-inch bypass piping shall be required where fire protection is required. 4-inch temporary hydrants are required where any existing hydrant is out of service. All customers shall be provided with water service to the maximum extent practicable. PVC is not allowed for by-pass. All by-pass piping must meet adequate drinking water standards prior to being put into service.

Question: What is the Start Date?

Answer: The Start day will be immediately after contract award; first week of May.

Question: What are the work hours?

Answer: City of Beverly work hours are typically 7 AM to 5 PM.

Question: Section 01616 requires testing of new Ductile Iron Pipe. As this is a rehabilitation project, will you accept existing line pressure testing only.

Answer: Existing operational pressure will be accepted for all work. Previous hydrant flow records indicate an acceptable operational pressure of approximately 90 PSI at 1,300 gpm.

Question: Section 02760, 2.02 prohibits use of PVC. Would the City allow Yellowmine be Certainteed, which is a Modified PVC Compound, restrained joint?

Answer: No.

Question: Can you please clarify temporary service / by-pass requirements?

Answer: 6-inch bypass

Question: What are the linear footages of items 2e and 2f?

Answer: Items 2e & 2f have been revised on the Bid tab to indicate estimated linear footages. Please refer to water ties for additional details.

Question: Items 7 & 8 state they include permanent paving. Clarify.

Answer: All items shall include temporary pavement as necessary to conduct construction activities. Permanent pavement is required in all trenches prior to final acceptance. Bituminous Type I-1 shall be used for binder and wearing courses in line with MassDOT Division III Materials section M3.11. Permanent Pavement shall consist of 4-inches of binder and 2-inches of wearing course. Bind

Question: Items 4b units are in LF. Should this be in CY?

Answer: Item 4b has been revised to cubic yards.

UPDATED BID PRICING PAGES

THESE REPLACE THE BID PRICING PAGES IN THE ORIGINAL BID DOCUMENT

The undersigned proposes to perform the Work, furnish all materials, and complete the Work in its entirety in the manner and under the conditions required at the prices listed as follows:

Item #	Est. Qty.	Written Description	Unit Cost (in figures)	Unit	Total Extended Cost (in figures)
1a	3,500	Cleaning, CCTV and lining of 6-inch water main using the drag-line method, including removal/replacement of existing main line gate valves, testing and chlorinating, temporary pavement and permanent pavement.	\$	Per linear foot	\$
1b	500	Cleaning, CCTV and lining of 8-inch water main using the drag-line method, including removal/replacement of existing main line gate valves, testing and chlorinating, temporary pavement and permanent pavement.	\$	Per linear foot	\$
1c	100	Cleaning, CCTV and lining of 10-inch water main using the drag-line method, including removal/replacement of existing main line gate valves, testing and chlorinating, temporary pavement and permanent pavement.	\$	Per linear foot	\$
1d	15,500	Cleaning, CCTV and lining of 12-inch water main using the drag-line method, including removal/replacement of existing main line gate valves, testing and chlorinating, temporary pavement and permanent pavement.	\$	Per linear foot	\$
1e	50	Cleaning, CCTV and lining of 14-inch water main using the drag-line method, including removal/replacement of existing main line gate valves, testing and chlorinating, temporary pavement and permanent pavement.	\$	Per linear foot	\$
1f	50	Cleaning, CCTV and lining of 16-inch water main using the drag-line method, including removal/replacement of existing main line gate valves, testing and chlorinating, temporary pavement and permanent pavement.	\$	Per linear foot	\$
1g	5	Additional cost to furnish and install 4 inch sideline gate valves and appurtenances on Country Drive, Hart Street, Hull Street, Preston Place, and Grapevine Road (Wenham).; including earth excavation, disposal, glands, nipples, anchor tees, backfill; temporary pavement and permanent pavement.	\$	Each	\$
1h	10	Additional cost to furnish and install 6 inch sideline gate valves and appurtenances on Country Drive, Hart Street, Hull Street, Preston Place, and Grapevine Road (Wenham).; including earth excavation, disposal, glands, nipples, anchor tees, backfill; temporary pavement and permanent pavement.	\$	Each	\$
1i	20	Additional cost to furnish and install 8 inch sideline gate valves and appurtenances on Country Drive, Hart Street, Hull Street, Preston Place, and Grapevine Road (Wenham).; including earth excavation, disposal, glands, nipples, anchor tees, backfill; temporary pavement and permanent pavement.	\$	Each	\$

1j	1	Additional cost to furnish and install 10 inch sideline gate valves and appurtenances on Country Drive, Hart Street, Hull Street, Preston Place, and Grapevine Road (Wenham).; including earth excavation, disposal, glands, nipples, anchor tees, backfill; temporary pavement and permanent pavement.	\$	Each	\$
1k	5	Additional cost to furnish and install 12 inch sideline gate valves and appurtenances on Country Drive, Hart Street, Hull Street, Preston Place, and Grapevine Road (Wenham).; including earth excavation, disposal, glands, nipples, anchor tees, backfill; temporary pavement and permanent pavement.	\$	Each	\$
1l	5	Additional cost to furnish and install 6 inch mainline gate valves and appurtenances on Country Drive, Hart Street, Hull Street, Preston Place, and Grapevine Road (Wenham).; including earth excavation, disposal, glands, nipples, anchor tees, backfill; temporary pavement and permanent pavement.	\$	Each	\$
1m	10	Additional cost to furnish and install 8 inch mainline gate valves and appurtenances on Country Drive, Hart Street, Hull Street, Preston Place, and Grapevine Road (Wenham).; including earth excavation, disposal, glands, nipples, anchor tees, backfill; temporary pavement and permanent pavement.	\$	Each	\$
1n	1	Additional cost to furnish and install 10 inch mainline gate valves and appurtenances on Country Drive, Hart Street, Hull Street, Preston Place, and Grapevine Road (Wenham).; including earth excavation, disposal, glands, nipples, anchor tees, backfill; temporary pavement and permanent pavement.	\$	Each	\$
1o	45	Additional cost to furnish and install 12 inch mainline gate valves and appurtenances on Country Drive, Hart Street, Hull Street, Preston Place, and Grapevine Road (Wenham).; including earth excavation, disposal, glands, nipples, anchor tees, backfill; temporary pavement and permanent pavement.	\$	Each	\$
2a	50	Install 1 in. corporation stops, including earth excavation, disposal, backfill; temporary pavement and permanent pavement.	\$	Each	\$
2b	50	Install 1 in. curb stops, including curb box, earth excavation, disposal, backfill; temporary pavement and permanent pavement.	\$	Each	\$
2c	1,250	Install 1 in. type K copper tubing and fittings to reconnect to the existing water services, including earth excavation, disposal, backfill; temporary pavement and permanent pavement.	\$	Per linear foot	\$
2d	-	Removed	-	-	-
2e	100	Install 1-1/4 : 2 in. type K copper tubing, corporation stop, curb stop & box, and fittings to reconnect to the existing water services, including earth excavation, disposal, backfill; temporary pavement and permanent pavement.	\$	Per linear foot	\$
2f	100	Install 4 in. DI service, corporation stop, curb stop & box, and fittings to reconnect to the existing water services, including earth excavation, disposal, backfill; temporary pavement and permanent pavement.	\$	Per linear foot	\$

Item #	Qty.	Written Description	Unit Cost (in figures)	Unit	Total Extended Cost (in figures)
3	100	Miscellaneous concrete and/or controlled density fill	\$	Per cubic yard	\$
4a	75	Rock excavation	\$	Per cubic yard	\$
4b	75	Boulder excavation	\$	Per cubic yard	\$
5a	300	Screened gravel for utility crossings and miscellaneous purposes	\$	Per cubic yard	\$
5b	250	Common fill replacement of unsuitable backfill and miscellaneous purposes	\$	Per cubic yard	\$
6	250	Excavation below normal grade, including backfill to return to normal grade	\$	Per cubic yard	\$
7	15	Install new hydrant assemblies including: 6-in gate valve with box cover; 6-in restrained joint, cement-lined ductile iron water main; new hydrant, earth excavation and backfill; temporary pavement and permanent pavement.	\$	Per cubic yard	\$
8	20	Remove obstructions including: cutting existing Piping; refitting piping; replacing bends and fittings earth excavation and Backfill; bracing; temporary pavement and permanent pavement.	\$	Each	\$
9a	20	Relay 4-inch DI water main including refitting piping; glands, nipples, anchor tees, earth excavation and Backfill; bracing and temporary and permanent pavement, testing and chlorinating, temporary pavement and permanent pavement.	\$	LF	\$
9b	20	Relay 6-inch DI water main including refitting piping; glands, nipples, anchor tees, earth excavation and Backfill; bracing and temporary and permanent pavement, testing and chlorinating, temporary pavement and permanent pavement.	\$	LF	\$
9c	500	Relay 8-inch DI water main including refitting piping; glands, nipples, anchor tees, earth excavation and Backfill; bracing and temporary and permanent pavement, testing and chlorinating, temporary pavement and permanent pavement.	\$	LF	\$
9d	20	Relay 10-inch DI water main including refitting piping; glands, nipples, anchor tees, earth excavation and Backfill; bracing and temporary and permanent pavement, testing and chlorinating, temporary pavement and permanent pavement.	\$	LF	\$
9e	200	Relay 12-inch DI water main including refitting piping; glands, nipples, anchor tees, earth excavation and Backfill; bracing and temporary and permanent pavement, testing and chlorinating, temporary pavement and permanent pavement.	\$	LF	\$
10	1	All temporary service / by-pass	\$	Lump Sum	\$

The quantities listed in the proposal are estimates. The City of Beverly, therefore, reserves the right to order the adjustment of a greater or a lesser quantity than shown.
