RE: Beverly Police Station Planning Review Changes

Dear Members of the Beverly Planning Board,

Changes in the design of the building and site were made during the intervening 6 months between the City's Planning submittal of the Beverly Police Station and the time that the drawings went to bid in January. The changes were minor, and include the following:

- The reduction of plaza pavement at the north staff entrance
- The reallocation of parking from staff to public, which entailed relocation of the secure fencing around the staff lot, and the realignment of the west end of the north parking lot.
- Relocation of the flagpoles from behind a segmental retaining wall to a more stable ground location to the north of the main entrance to the building
- The addition of a walkway on the south side of the building to provide ADA access from the stair well and the Prisoner release to the visitor parking.

Back in May of this year, we received approval from the DRB for these changes. We would now like to present these same changes to the Planning Board. All of these changes are shown on the attached plans. We have included two files, the first being the original application drawings and the second, the actual documents that went to bid for your comparison. We look forward to discussing these changes if need be and answering any questions you might have pertaining to them.

Thank you for your consideration regarding this project. If the Board or City staff have any questions, please feel free to contact our office or me directly.

Sincerely,

David McKinley
